

IEEE 6G SUMMIT DRESDEN 2024

May 13 – 14, 2024

Leading the Way: IEEE 6G Summit Dresden 2024 Promotes Sustainability

Welcome to the IEEE 6G Summit 2024: Promoting Sustainability

At the TU Dresden, we are proud to host the IEEE 6G Summit 2024, where cutting-edge discussions on the future of telecommunications take place. In line with our commitment to innovation, we also prioritize sustainability in every aspect of our event planning. By implementing thoughtful practices and conscious decision-making, we aim to minimize our environmental impact and contribute to a more sustainable future.

Our Sustainability Principles and Practices

At the IEEE 6G Summit 2024, sustainability is integrated into every stage of event planning. Here's how we're ensuring a sustainable experience for our attendees:

1. Venue Selection:

- Our event will take place at Messe Dresden, a venue known for its commitment to sustainability, including eco-friendly certifications and energy-efficient facilities.
- Messe Dresden offers waste reduction initiatives, recycling programs, and sustainable transportation options.

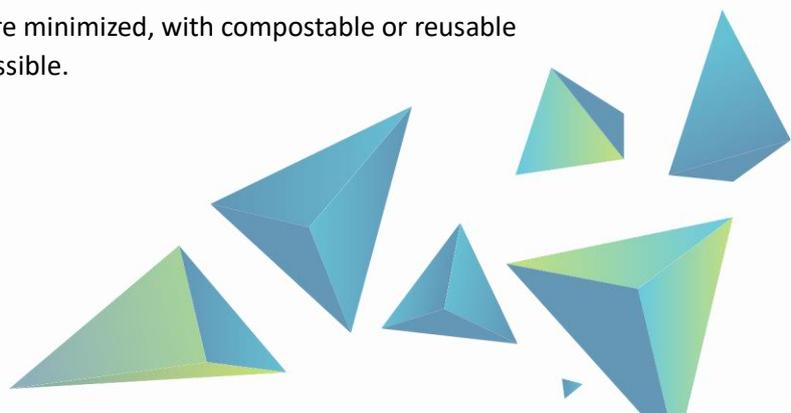

2. Waste Reduction:

- We minimize waste by utilizing digital event materials, reusable signage, and compostable or recyclable packaging.
- Attendees are encouraged to bring reusable water bottles, and water refill stations will be available at the venue.

3. Sustainable Catering:

- Our catering partner, Teichmann Catering, shares our commitment to sustainability.
- Teichmann Catering prioritizes locally sourced, organic, and sustainably produced food and beverages.
- Single-use plastics and packaging are minimized, with compostable or reusable alternatives provided whenever possible.

IEEE 6G SUMMIT DRESDEN 2024

May 13 – 14, 2024

4. **Transportation Options:**

- Dresden Messe is located in the heart of Dresden, making it easily accessible by train and public transport. The venue is well-connected to the city's public transportation network, including tram and bus services.
- Attendees are encouraged to utilize sustainable transportation options such as public transit, biking, carpooling, and electric vehicles.

5. **Innovation and Knowledge Transfer:**

- Join our session on smart cities and carbon neutrality, where we focus on innovative transformations and knowledge transfer between technology and carbon neutrality.

6. **Carbon Impact Awareness:**

- While calculating the carbon footprint of the event may be challenging, we remain committed to raising awareness about carbon impact and promoting sustainable practices.
- Our events serve as platforms to educate attendees about sustainability issues and showcase sustainable practices.
- Calculate the carbon footprint of the IEEE 6G Summit 2024 using this online tool: [link](#).

7. **Measurement and Evaluation:**

- We track metrics such as waste diversion rates, energy consumption, and attendee satisfaction with sustainable practices through post-event surveys and feedback mechanisms.

Join Us in Our Commitment to Sustainability

Together, let's make a positive impact on our environment and communities. Join us at the IEEE 6G Summit 2024 as we lead the way towards a more sustainable future.
